Patent Application Information Form

Section 1: Applicant and Inventor Information

1.Full Name: ..... Applicant Type (Natural Person / Legal Entity): ..... National ID / Legal Entity Identification Number: .....
Nationality: ..... Telephone Number: .....
Email: .....
Address: .....

2.Is the applicant different from the inventor?
☐ Yes ☐ No If yes, proof of ownership must be attached.

3.Do you claim a right of priority?
☐ Yes ☐ No
If yes, please provide the date, application number, and country of the basic application.

Section 2: General Information About the Invention

1.Title of the Invention (3 to 10 words, without ambiguous terms):

2.Is your invention a "product," a "process," or both?

3.Technical Field of the Invention
(Examples: Mechanical Engineering, Chemistry, Electrical Engineering, Medicine, Software, etc.)

4.What does your invention do, in brief? (Maximum 5 lines)

ROYAL GROUP
المركز الملكى لتنمية الاستثمارات الدولية
سلطنة عمان
Royal International Investments Development Center

Section 3: Technical Problem and Purpose of the Invention

1.What problem does your invention solve in the existing technology, and how was this problem previously addressed?

2.What disadvantages or limitations existed in the previous methods?

3.What is the primary purpose of your invention?

Section 4: Prior Art and Distinction of the Invention

1.Are you aware of any product, article, patent, or method that is close to your invention?

2.What are the details of the closest prior-art document, and what exactly distinguishes your invention from that document?

Section 5: Disclosure and Commercialization

1.Have you previously disclosed the invention to the public?

(Article, exhibition, sale, conference)

☐ Yes ☐ No If yes, when was the disclosure made?

ROYAL GROUP
المركز الملكى لتنمية الاستثمارات الدولية
سلطنة عمان
Royal International Investments Development Center

2.Do you intend to manufacture, sell, or license the invention?

3.In which countries and when do you intend to commercialize the invention?

Section 6: Components, Materials, and Steps of the Invention

(Completion of this section during the consultation stage is optional.)

1.What components or materials does your invention consist of?
(Please list them.)

2.If it is a process, what steps are required to implement it?
(Please list them in order.)

3.How are these components or steps combined, or how do they interact with one another?

4.Which features are **essential and indispensable** for the operation of the invention?

5.Which features are **optional** and only serve to improve performance?

ROYAL GROUP
المركز الملكي لتنمية الاستثمارات الدولية
سلطنة عمان
Royal Investments Development International Center

6.What is the best method or embodiment for implementing the invention?

Section 7: Supporting Documents

(Completion of this section during the consultation stage is optional.)

1. Technical drawing or image
2. Diagram or flowchart
3. Chemical or mathematical formula
4. Laboratory data
5. Proof of ownership (if the applicant and inventor are different)
6. Priority documents (if applicable)
7. Other documents

Section 8: Additional Information

Is there any other information or point that you believe we should know?

I, the undersigned, ..., hereby confirm that the information provided in this form, completed on ....., is accurate and complete, and I accept responsibility for the accuracy of the contents provided on all three (4) pages.
